

Inaugural lecture

Nir Jaimovich: Employment and the Macroeconomy: Facts, Theory, and Policy

Monday, November 4, 2019 | 6.15 to 7.00 PM | University of Zurich | Main auditorium | KOL-G-201

Advances in automation technologies have left an indelible mark on the labor market in industrialized economies, as they have experienced a significant drop in the fraction of the population employed in jobs in the middle of the occupational wage distribution. In his inaugural lecture, Nir Jaimovich will address this phenomenon and discuss various public policies options.

Nir Jaimovich was appointed as Professor of Economics, affiliated with the UBS Center, in 2017. His research aims at macroeconomics, cyclical fluctuations and labor economics.

Professor Jaimovich's inaugural lecture will be open to the public and will be followed by a cocktail reception in the Lichthof.
